EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert B. Levy on September 22, 2008.

The application has been amended as follows:

Claim 16 has been cancelled to place this application in condition for allowance.

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to the method for controlling a device for the distribution and processing of video signals. The independent claim 1 identifies the distinct features: "input signals are represented on a display with an input symbol; input signals with common properties are assigned input symbols which have a common color property and/or graphical property; the relations between a specific input symbol and the assigned input signal and the relevant input are stored; and an output of the device is assigned an output symbol, which represents the desired properties of the output signal in the same way as the input symbols represent the properties of the input signals". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
